

CALI LESSONS

The library is a member of CALI (Computer Assisted Legal Instruction) and offers access to its database of over 300 computer-based lessons on 29 legal topics. The lessons are designed to reinforce classroom instruction and can be assigned to students as an individualized study aid. Most of these lessons are available on the World Wide Web, although the library has CD-Rom versions that can be checked out from the circulation department. CALI web exercises can be linked to professors' web course pages on TWEN. There is a link on the law library web page to the CALI lessons or you can access them at <http://www2.cali.org/>. The CALI web page provides a catalog describing all of the lessons and includes suggestions for using them effectively. You will need a password to register to use CALI. The password is CATHLCfac34 (it is case sensitive).

Listed below are the subject areas covered by CALI lessons.

- Administrative Law
- Arbitration
- Civil Procedure
- Civil Rights
- Commercial Transactions
